Project Manager:
Gary Stechschulte
Superintendent:
Mike Schuerman

Norwich Fire Department Addition, Hilliard, OH

Project inception date: 8/1/2007

Project completion date: 9/1/2008

Contract Amount: \$750,000

Construction type: General Contract -Hard Bid

Project scope:

Tuttle Construction provided the General Contracting Services for this project and coordinated all of the masonry work. This project consisted of exterior masonry using brick and block. Interior masonry was used, including the basement. Stone veneer with limestone sills and waterables were an important part of this project.

Project accomplishments:

Tuttle had to be careful in evaluating the new building addition compared to the existing building, knowing that there would be partial demo. Despite severe winter weather conditions, the Tuttle Team successfully poured the basement walls without any problems. The project is expected to be completed on schedule.
