Project Manager:
Mike Baxter
Site Superintendent:
Brad Elmquist

P&G West Lot Pavement Replacement

Project inception date: August 2007

Project completion date: October 2007

Contract Amount: \$ 107,180.

Construction type: General Contractor
Hard bid

Project scope:

15 Sawing: Saw cutting was performed to cut and remove 7,295 SF of concrete paving in manageable size pieces for efficient loading into dump trucks.

17 Rigid Pavement Replacement: 7,295 SF of pavement was saw-cut, removed, and replaced. Placed 300 CY of ODOT-MS800. All work was performed under compliance with ODOT Construction and Material Specifications and the current ODOT Standard Detail Drawings.

39 Maintenance of Traffic: Work took place in a shipping lot where solid stream of loaded and unloaded tractor trailers were continuously hauling products and could not be delayed. Due to the high traffic and visible nature of the work area, and its proximity to operational plant areas, jersey barriers, signage and personnel were utilized to maintain the flow of traffic and the safety of the workers.

48 Trucking: Loaded and hauled 300 CY of removed concrete off site for disposal.
