Spencerville WWTP Improvements

Project inception date: 6/1/98

Project completion date: 6/1/99

Project scope:

This was a general contract which was competitively bid. The project included 2 new SBR basins/equipment and SBR control building equipment, 2 new aerobic digesters/equipment, converting a polishing lagoon to an equalization lagoon by adding a vortex valve structure and three new aerators, converting a chlorine contact tank to an ultra violet structure, demolishing an existing primary settling tank, upgrading sludge storage tanks by repairing/extending walls, painting and installing new equipment, converting an existing digester tank to a sludge storage tank, plus various site improvements i.e., new asphalt, sidewalks, seeding, and replacing existing pumps and blowers.

Project accomplishments:

This project was finished 1.5% to 2% ahead of budget and completed on time.
